

I strongly urge you to reject NAB's petition 04-160, which attempts to restrict XM's ability to provide traffic and weather to motorists and consumers. I use XM's traffic service daily, and i find it gives me everything I need. I pay a premium to receive satellite radio because it is so much better than the regular services abvailable to me. I do not believe that the NAB should have any right to attempt to stop a service which is not even threatening their market share.
